Pollachi, 642006, India.

Skills

- Cloud Technologies
- Network Configuration
- Security Tools
- Bash Scripting
- Asset Management
- Monitoring Tools
- Internal Communication Platforms
- Web Servers
- Database Management
- Backup Solutions
- Problem Solving
- Hardware Troubleshooting

Language

- English
- Tamil

About Me

Dedicated and performance-driven IT professional with 3 years of hands-on experience in Linux system administration, network infrastructure management, and open-source IT solutions.. Eager to contribute to organizations seeking system stability, efficiency, and secure IT operations.

Experience

LINUX SYSTEM ADMINISTRATOR

AUG 2022– Present

NOVALNET E-SOLUTIONS PVT LTD.

- Managed 50+ Linux servers (Ubuntu, CentOS, Red Hat) ensuring high availability and performance.
- Configured LAN/WAN, VLANs, routing protocols, and deployed routers/switches.
- Administered DNS, DHCP, VPN, FTP, and SSH services.
- Automated monitoring, backups, and routine tasks using Bash/scripting.
- Implemented security policies, log monitoring, and threat mitigation.
- Integrated asset management and internal communication tools for IT operations.

Education

Bachelor of Arts in Computer Application

2017– 2020

Sree Saraswathi Thyagaraj College, Pollachi

Projects

1. Server Monitoring and Automation System

- Automated monitoring using Bash, cron, jq, and API integration.
- Collected CPU, RAM, Disk, Network, and service metrics.
- Integrated alerts for service failure and abnormal usage.

Technologies: Bash, Cron, cURL, jq, Linux (Ubuntu/Kali), Systemd.

2. Web Application Hosting and Deployment

- Implemented Apache/Nginx hosting and SSL configuration.
- Automated backup and server hardening.
- Reduced downtime through proactive maintenance.

Technologies: Apache/Nginx, MySQL/MariaDB, Git.

3. MySQL Database Performance Monitoring

- Identified real SQL commands in slow/running processes.
- Enabled general & slow logs and automated reporting.

Technologies: MySQL, Bash, Cron, Log Parsing.

4. Secure Remote Shutdown Automation

- Used Zenity prompts to confirm shutdown from logged in users.
- Email reporting for shutdown reasons and delays.

Technologies: SSH, Zenity, Bash, Email Automation.

5. Network & Log Security Alert System

- Detected brute-force attacks using proactive alerting.
- Implemented log anomaly detection rules.

Technologies: Rsyslog, UFW/Firewalld, Fail2ban.

6. Linux Patch Management Automation

- Automated update rollout with reporting and rollback.
- Improved overall system security compliance.

Technologies: Bash, APT/YUM, Cron, Ansible.

CORE COMPETENCIES

Open to opportunities where I can contribute my expertise in Linux administration, networking, and IT security while continuously learning and growing.

Place: Chennai
